PROFESSIONAL SUMMARY

Software Engineer Apprentice in the CIB Collections team at Standard Chartered GBS, building scalable backend microservices using Java, Spring Boot, React.js, and REST APIs. Passionate about clean code, reliable system design, API integration, automation, and cross-team collaboration.

EDUCATION

2021 – 2025 **BTech in Computer Science and Engineering**, SRM University AP (GPA: 8.24/10)

WORK EXPERIENCE

Development Engineer Apprentice – Technology, Standard Chartered GBS India *Sep 2025 – Present*

Tech Stack: Java, Spring Boot, Microservices, REST APIs, Apache Camel, Oracle, JUnit, Maven, Azure DevOps, CI/CD

- Implemented processing logic for **pacs.002**, **pain.012**, **camt.005**, and **admi.002** ISO 20022 messages within Spring Boot microservices using Apache Camel and Solace.
- Built channel and country-specific unmarshalling with field-level and business-level validation prior to transforming payloads into standardized entities.
- Developed a TAR report processor to parse RPP 101 CSV reports into structured entity models.
- Built a scheduler-driven message builder to trigger SLA-based debit enquiries.

Java Stack Intern – Infosys Springboard *Nov 2024 – Feb 2025*

- Developed and deployed a full-stack web application using **Java**, **JavaScript**, **React**, and RESTful APIs.
- Integrated backend services with relational databases, improving query performance and overall application efficiency.

PROJECTS

Real-Time Direct Debit Instruction (RTDDI) – Standard Chartered Bank *2026 – Present*

- Integrated multi-country, multi-channel transactions into a unified RTDDI platform, supporting on-us and off-us flows.
- Designed modular Java components per business rule (validation, transformation, persistence) for reusability and maintainability.
- Utilized ESIF framework modules (Core, Oracle, Drools, REST API) for utilities, DB integration, and validation.
- Used **Spring Data JPA** for reliable, idempotent persistence of DDI transaction records in Oracle DB.

Bank Indonesia Fast Payment – Standard Chartered Bank *Jan 2026 – Apr 2026*

- Configured YAML-driven routing across multiple microservices to dynamically dispatch messages from source to destination based on channel/country.
- Authored **JUnit** tests with **JaCoCo** coverage and end-to-end test automation.
- Deployed microservices on **SKE** using **Kubernetes** and **Helm**, with automated **ADO** CI/CD pipelines.

Loan Origination System – Maker-Checker Loan Platform *Sep 2025 – Nov 2025*

- Developed a secure loan platform using **Java**, **Spring Boot**, **REST APIs**, **JWT**, and **MySQL** with authentication and RBAC.
- Built a responsive **React.js** frontend using HTML, CSS, JavaScript, and TypeScript, integrated with REST APIs.
- Implemented a **Maker-Checker workflow** with role-based approvals, automated notifications, and client-server architecture.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, SQL

Frontend: React.js, HTML, CSS, javascript

Backend & APIs: Spring Boot, Spring Data JPA, REST APIs, Microservices

Messaging & Integration: Apache Camel, Kafka, Solace

Databases: Oracle, MySQL, PostgreSQL, MongoDB

Cloud & DevOps: Microsoft Azure, Kubernetes, Helm

Software Engineering: OOP, Automation, API Integration, Performance Optimization

Tools: Git, Maven, Linux, AI-Assisted Development (Copilot)

ACHIEVEMENTS

- Awarded **SNF (Shiv Nadar Foundation)** 100% academic scholarship.
- Participant – **Code2Code Hackathon** (Automated the consolidation of various reports).

CERTIFICATIONS

- **Standard Chartered (SCB):** Fundamentals of Containerization (ID: 0053179037), Payment Domain Training (ID: 0072589667), SC DevKit Essentials (ID: 0071720057), Kafka
