PROFESSIONAL SUMMARY

Results-driven Software Engineer serving as a Development Engineer at standard chartered GBS, with hands-on experience in backend and full-stack development. Skilled in building scalable solutions, passionate about clean code and delivering impactful results through cross-team collaboration

EDUCATION

2021 – 2025 **BTech in Computer Science and Engineering**, SRM University AP (GPA: 8.24/10)

WORK EXPERIENCE

Development Engineer – Apprentice, Standard Chartered GBS India *Sep 2025 – Present*

- Developed validation, transformation, persistence, and publishing modules for multi-country **eCollections** payment processing using **Apache Camel**, **MapStruct**, and ESIF validation.
- Designed and implemented **ISO 20022** compliant message models (**pain.012**, **pacs.002**, and **admi.002**) with a strategy-based message resolver for automatic detection and processing of incoming banking message types.
- Implemented idempotent message publishing with retry mechanisms, exponential backoff, and the Outbox pattern to ensure reliable transaction processing and persistence in **Oracle Database**.
- Actively contributing to the **RTDDI** platform by developing field-level validation, business validation, transaction persistence, and response processing modules as part of an Agile development team.
- Configured and maintained **Azure DevOps** CI/CD pipelines, developed **JUnit** test cases, integrated **JaCoCo** code coverage, and performed end-to-end testing to ensure application quality and reliability.

PROJECTS

Real-Time Direct Debit Instruction(RTDDI)Processing Platform -SCB *2026–Present*

- Built a country- and channel-aware validation framework using **Apache Camel** with configurable routing and standardized NACK error handling.
- Designed a multi-channel transformation pipeline using mapstruct to convert API banking, SC mobile and S2B payloads into a unified canonical model, decoupling channel logic from core processing
- Built an end-to-end RTDDI persistence layer using Spring Data JPA and Outbox pattern to persist DDI transaction record into oracle DB.

Bank Indonesia Fast Payment – Standard Chartered Bank *Jan 2026 – Apr 2026*

- Developed **Java Spring Boot** microservices to process **ISO 20022 pacs.002 ACK/NACK** and **admi.002** messages for real-time cross-border payment transactions.
- Developed end-to-end response processing with data transformation, persistence, and asynchronous messaging using **Apache Kafka** and **Solace**.
- Deployed and maintained microservices on the **Standard Chartered Kubernetes Engine (SKE)** using **Kubernetes**, **Helm**, and automated **Azure DevOps (ADO)** CI/CD pipelines.
- Developed comprehensive **JUnit** test cases and executed end-to-end integration testing to ensure reliable message processing, transaction integrity, and production readiness.

Loan Origination System – Maker–Checker Loan Platform *Sep 2025 – Nov 2025*

- Developed a secure loan origination system using **Java**, **Spring Boot**, **REST APIs**, **JWT**, and **MySQL**.
- Implemented a **Maker–Checker** workflow with RBAC, automated notifications, and reliable loan processing.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, SQL **Databases:** MySQL, PostgreSQL, MongoDB

Backend: Spring Boot, RESTful APIs, Kafka, Microservices **Cloud:** AWS, Microsoft Azure

Tools & Platforms: Azure DevOps (ADO), Git, Maven, Linux, Kubernetes, CI/CD Pipelines, AI Assistant Dev

ACHIEVEMENTS

- Awarded **SNF (Shiv Nadar Foundation)** 100% academic scholarship.

CERTIFICATIONS

Coursera: AWS Cloud Technical Essentials (Verify) **NPTEL:** Database Management Systems (Elite) (Verify)

Microsoft: AZ-900: Azure Fundamentals (In Progress)

Standard Chartered (SCB): Fundamentals of Containerization (ID: 0053179037), Payment Domain Training (ID: 0072589667), SC DevKit Essentials (ID: 0071720057)

Standard Chartered (SCB): Participant – Code2Code Hackathon (Automated the consolidation of various reports)
