PROFESSIONAL SUMMARY

Technology Apprentice (Development Engineer) at Standard Chartered GBS with hands-on experience in banking applications, Oracle/SQL data processing, Java microservices, and production issue troubleshooting. Strong in transaction validation/transformation, release support, and cross-functional collaboration. Familiar with incident/problem/change processes and payment domain operations.

EDUCATION

2021 – 2025 **BTech in Computer Science and Engineering**, SRM University AP (GPA: 8.24/10)

WORK EXPERIENCE

Standard Chartered GBS India

Sep 2025 – Present

- Processed and analyzed high-volume financial transaction data using Java, SQL, and Oracle to support reliable banking operations.
- Developed and enhanced ISO 20022 processing workflows to improve message accuracy and turnaround time.
- Performed data validation, transformation, and persistence checks for near real-time payment processing systems.
- Collaborated with business, delivery, and support teams to troubleshoot production issues and support incident resolution.
- Contributed to release quality via JUnit test development and Azure DevOps CI/CD execution.

Infosys Springboard

Nov 2024 – Feb 2025

- Built full-stack features using Java, React, SQL, and REST APIs.
- Optimized SQL queries and improved backend-database integration performance.
- Collaborated with team members to deliver business requirements within project timelines.

KEY PROJECTS

RTDDI Processing Platform (SCB)

2026 – Present

- Built validation and transformation modules for real-time direct debit transaction flows.
- Implemented multi-channel data mapping using MapStruct; designed persistence with Spring Data JPA and Oracle.

Bank Indonesia Fast Payment (SCB)

Jan 2026 – Apr 2026

- Developed Spring Boot services for ISO 20022 pacs.002/admi.002 ACK/NACK response processing.
- Implemented transformation, persistence, and async messaging via Kafka and Solace; deployed on Kubernetes (SKE) with Helm and ADO pipelines.
- Developed JUnit test cases and performed end-to-end integration testing for reliable message processing.

Loan Origination System (Maker-Checker)

Sep 2025 – Nov 2025

- Built secure APIs with Java, Spring Boot, JWT, and MySQL.
- Implemented maker-checker workflow with RBAC, automated notifications, and reliable loan processing.

CORE SKILLS

Domain: Payments, ISO 20022, Fund Services/Custody (basic knowledge)

Technical: Java, SQL, Oracle, Spring Boot, REST APIs, Microservices, Kafka, Solace

Quality: JUnit, integration testing, log/data analysis

Support: Incident support, problem analysis, change/release support

Tools: Unix/Linux, Azure DevOps, Git, Maven, Kubernetes, Helm, CI/CD, Confluence/Jira/ADO

CERTIFICATIONS & ACHIEVEMENTS

- **Coursera:** AWS Cloud Technical Essentials (Verify)
- **Standard Chartered (SCB):** Fundamentals of Containerization, Payment Domain Training, SC DevKit Essentials
- Awarded **SNF (Shiv Nadar Foundation)** 100% academic scholarship.
- Participant – SCB Code2Code Hackathon (Automated the consolidation of various reports)
