

Mudassir Khan

Executive – Full Stack Development · Python, JavaScript, React & AWS

+91 7398830431 · mudassirworkkhan@gmail.com · Bengaluru / Hyderabad (Open to Relocation)

[LinkedIn](#) · [GitHub](#)

Profile

Innovative Computer Science Engineering graduate with a strong foundation in full-stack web development, Python, JavaScript, and cloud infrastructure. Experienced in software implementation, application support, REST API integrations, and troubleshooting production issues across RDBMS and NoSQL databases. Eager to leverage problem-solving skills and technical proficiency in the Digital Excellence Centre at Deloitte.

Experience

Full Stack AI Intern

January 2026 – April 2026

Bespokible (Neometa Ventures)

Remote / Hybrid

- Engineered and customized web application features and backend workflows using **Python** and **JavaScript**, accelerating time-to-value for internal operations and driving measurable efficiency.
- Led rapid troubleshooting and application support for production issues, minimizing downtime to ensure enterprise-grade reliability and scalability.
- Architected REST API integrations to seamlessly manage complex data flows across relational and non-relational database architectures.
- Collaborated within an Agile environment to support client-facing technical solutions, streamlining deployment workflows and adoption velocity.

Freelance Full Stack Developer

January 2025 – October 2025

Self-Employed

Remote

- Independently designed, developed, and deployed **PolicyWazir** (policywazir.com) end-to-end, integrating **Zoho Workspace** to create a scalable, collaborative client environment.
- Architected the **LIT Scholarship Portal** ([Live Link](#)) using the **MERN Stack** and **Next.js**, implementing complex, enterprise-grade **Role-Based Access Control (RBAC)** to securely govern sensitive data workflows.
- Directed end-to-end project lifecycles—from executive technical discovery and architecture design to deployment—partnering closely with client stakeholders to ensure rapid adoption and reliable delivery.

Key Projects

WanderLust AI – AI-Powered Travel Itinerary Planner

[Live Link](#)

- Built an AI travel planner with **Next.js** and **TypeScript**, using Google's **Gemini** model to generate personalized day-by-day itineraries based on destination, budget, traveler type, and interests.
- Integrated **Google Maps** for location context and activity deep-links, with print-optimized PDF export and dynamic destination imagery.

RAG-Based Document Q&A System – Python, LangChain, FAISS, Groq LLM

- Built an end-to-end Retrieval-Augmented Generation pipeline: PDF/text ingestion, recursive chunking, embedding generation (Sentence Transformers), and semantic search using **FAISS** vector store.
- Integrated **Groq LLM API** for AI-powered answer generation with source tracking and confidence scoring.

High-Availability Web Application Architecture – AWS EC2, ALB, Nginx

- Deployed and supported scalable cloud applications on AWS EC2 using Application Load Balancers (ALB), Linux environment configuration, and log-based troubleshooting for high availability.

Skills

- Programming Languages:** Python, Java, Springboot, JavaScript, TypeScript, C++, SQL.
- Web Technologies:** React.js, Next.js, Node.js, FastAPI, REST APIs.
- Databases & Cloud:** RDBMS (SQL), NoSQL (MongoDB), AWS (EC2, S3, Application Load Balancers), Docker.
- Core Competencies:** Software Implementation, Application Support, Root Cause Analysis (RCA), Problem-Solving, Agile Methodologies, Security Best Practices.

Education & Certifications

Bachelor of Technology in Computer Science Engineering · ZHCET, Aligarh Muslim University 2019-2023

Aggregate Score: 85.5%

Master of Technology in Computer Science Engineering (Paused after Year 1) · ZHCET, Aligarh

Muslim University

2023-2024

[Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate](#)

October 2025

AWS Cloud Infrastructure Training · Internship Studio

October 2025
