 LeetCode

PROFESSIONAL SUMMARY

Analytical and detail-oriented Associate Analyst candidate with hands-on experience in SQL, data analysis, backend development, and banking technology at Standard Chartered GBS. Skilled in analyzing data, solving complex business problems, developing scalable applications, and collaborating with cross-functional teams

EDUCATION

2021 – 2025 **BTech in Computer Science and Engineering**, SRM University AP (GPA: 8.24/10)

WORK EXPERIENCE

Development Engineer – Apprentice, Standard Chartered GBS India *Sep 2025 – Present*

- Analyzed and processed high-volume financial transaction data using Java, SQL, and Oracle Database.
- Designed and developed ISO 20022 message processing workflows to improve payment processing efficiency and accuracy.
- Performed data validation, transformation, and persistence for real-time banking applications.
- Collaborated with cross-functional teams to troubleshoot production issues and optimize business workflows.
- Automated CI/CD processes using Azure DevOps and developed JUnit test cases to ensure software quality.

Full Stack Developer Intern – Infosys Springboard *Nov 2024 – Feb 2025*

- Developed full-stack applications using Java, React, SQL, and REST APIs.
- Optimized SQL queries and integrated backend services with relational databases.
- Collaborated with team members to deliver business requirements within project timelines.

PROJECTS

Real-Time Direct Debit Instruction(RTDDI)Processing Platform -SCB *2026–Present*

- Developed validation and transformation modules for real-time direct debit transactions.
- Built data mapping and transformation logic using MapStruct for multiple banking channels.
- Designed persistence workflows using Spring Data JPA and Oracle Database for reliable transaction processing.

Bank Indonesia Fast Payment – Standard Chartered Bank *Jan 2026 – Apr 2026*

- Developed **Java Spring Boot** microservices to process **ISO 20022 pacs.002 ACK/NACK** and **admi.002** messages for real-time cross-border payment transactions.
- Developed end-to-end response processing with data transformation, persistence, and asynchronous messaging using **Apache Kafka** and **Solace**.
- Deployed and maintained microservices on the **Standard Chartered Kubernetes Engine (SKE)** using **Kubernetes**, **Helm**, and automated **Azure DevOps (ADO)** CI/CD pipelines.
- Developed **JUnit** test cases and performed end-to-end integration testing for reliable message processing.

Loan Origination System – Maker–Checker Loan Platform *Sep 2025 – Nov 2025*

- Developed a secure loan origination system using **Java**, **Spring Boot**, **REST APIs**, **JWT**, and **MySQL**.
- Implemented a **Maker–Checker** workflow with RBAC, automated notifications, and reliable loan processing.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, SQL **Databases:** MySQL, PostgreSQL, MongoDB

Backend: Spring Boot, RESTful APIs, Kafka, Microservices **Cloud:** AWS, Microsoft Azure

Tools & Platforms: Azure DevOps (ADO), Git, Maven, Linux, Kubernetes, CI/CD Pipelines, AI Assistant Dev

Analytics & Data: SQL, Python (Fundamentals), Tableau, Finance Risk Concepts, Analytical & Problem-Solving Skills.

ACHIEVEMENTS

- Awarded **SNF (Shiv Nadar Foundation)** 100% academic scholarship.

CERTIFICATIONS

Coursera: AWS Cloud Technical Essentials (Verify) **NPTEL:** Database Management Systems (Elite) (Verify)

Standard Chartered (SCB): Fundamentals of Containerization (ID: 0053179037), Payment Domain Training (ID: 0072589667), SC DevKit Essentials (ID: 0071720057)

Standard Chartered (SCB): Participant – Code2Code Hackathon (Automated the consolidation of various reports)
