SUMMARY

Self-taught Frontend Engineer with 3+ years of experience building scalable, production-grade web applications using React and TypeScript. Recently worked on onboarding and activation flows at Razorpay, serving millions of merchants. Experienced in frontend architecture, testing, and performance optimization for high-scale products.

EXPERIENCE

Product Development Engineer I - Frontend Aug 2024 — Jun 2026
Razorpay Bengaluru, Karnataka

- Improved Razorpay's onboarding, FTUX (First-Time User Experience), and activation flows, driving gains in first-transaction conversion
- Enhanced the CMMA (Case Management and Monitoring Application) dashboard, reducing friction in high-volume merchant activation workflows
- Built deep CMMA expertise, becoming a key resource for troubleshooting, knowledge sharing, and cross-team support
- Contributed to [Blade](#) (Razorpay's core frontend library and open-source design system) and server-driven UI SDK, now powering 10+ onboarding applications
- Achieved 80% E2E test coverage and 96% unit test coverage for onboarding flows using Playwright and Jest, significantly reducing post-release bugs
- Provided 24x7 on-call support, debugging and resolving production issues that blocked merchant onboarding and activation
- Leveraged AI tools to automate merchant onboarding org-wide (cutting setup time from 30-40 minutes to 7 minutes) and reducing production MTTR by ~40% during on-call incidents.

React Developer Jan 2024 — Jul 2024
Scanntek Solutions Dubai, UAE

- Improved the performance and stability of a restaurant POS platform used across the UAE, Bahrain, and Oman, modernizing a legacy system and driving the platform's PWA adoption.
- Re-engineered complex analytics dashboards, introducing high-efficiency data visualizations and reducing render overhead and enabling real-time insights for restaurant operators

Full Stack Engineer Aug 2022 — Dec 2023
Freelance

- Delivered full-stack applications for clients across India and Saudi Arabia, leading development and deployment
- Built strong client partnerships through transparent communication, fostering long-term collaborations

SKILLS

Frontend	React, Next.js, TypeScript, JavaScript (ES6+), GraphQL, Redux Toolkit, Zustand, React Query, CI/CD, Tailwind CSS, Accessibility (WCAG, ARIA), npm / pnpm, Responsive Design, Performance Optimization, Feature Flags
Familiar	Node.js, ExpressJS, REST APIs, MongoDB, PostgreSQL, Firebase, JWT, AWS (EC2, S3, CloudFront, Route 53), Docker, NGINX, Git, GitHub Actions, Spinnaker Pipelines
Tools & Quality	Sentry, Coralogix, Jira, DevRev, Playwright, Jest, A/B testing, Analytics instrumentation, Webpack

PROJECTS

- Safely - Women Cab Booking** | *React, TypeScript, Redux, Express, MongoDB, Socket.IO, AWS, Google Maps, Stripe* Live | [GitHub](#)
- Delivered a safety-first platform with real-time tracking, driver-user chat, admin dashboards, and payments powered by Stripe, along with a wallet system
 - Developed in 2023 by reading official docs and Stack Overflow, building strong problem-solving and debugging skills in the pre-AI era
- AI Trading Automation** | *React, Go, Python, GraphQL, WebSockets, PostgreSQL, Redis* Tech-spec | [Prototype](#) | [GitHub](#)
- Architected AI-powered trading system with real-time signal generation, order execution, and performance tracking
- Yara — E-commerce** | *Node.js, Express, MongoDB, HTML, CSS, Razorpay, AWS EC2, NGINX* Live | [GitHub](#)
- Built end-to-end e-commerce platform with search, cart, order tracking, referral rewards, and admin dashboard

EDUCATION

Bachelor of Computer Application Jul 2019 — Jul 2022
Kannur University, Kannur, Kerala
